

Medications covered in Medcheck

Analgesia | Pain

Opioids

- Alfentanil
- Codeine
- Fentanyl
- Hydrocodone
- Morphine
- Oliceridine
- Tramadol

NSAIDs

- Celecoxib
- Flurbiprofen
- Ibuprofen
- Meloxicam
- Piroxicam
- Tenoxicam

Pain and Antidepressants

- Amitriptyline
- Desipramine
- Imipramine
- Nortriptyline
- Venlafaxine

Muscle Relaxants

- Carisoprodol

Autoimmune

Immunosuppressants

- Cyclosporine
- Methotrexate
- Siponimod
- Tacrolimus

Cancer

Anti-Estrogens

- Tamoxifen

Anti-Folate

- Methotrexate

Protein Kinase Inhibitors

- Erdafitinib
- Gefitinib

Cardiovascular

Antiarrhythmics

- Flecainide
- Propafenone

Anticoagulants

- Warfarin

Antiplatelets

- Clopidogrel

Beta Blockers

- Carvedilol
- Metoprolol
- Nebivolol
- Propranolol

Cardiomyopathy

- Mavacamten

Statins

- Atorvastatin
- Fluvastatin
- Lovastatin
- Pitavastatin
- Pravastatin
- Rosuvastatin
- Simvastatin

Endocrinology

Meglitinides

- Nateglinide

Gastroenterology

Antiemetics

- Dronabinol
- Metoclopramide
- Ondansetron

Antihistamine

- Meclizine

Proton Pump Inhibitors

- Dexlansoprazole
- Esomeprazole
- Lansoprazole
- Omeprazole
- Pantoprazole
- Rabeprazole

Infection

Antifungals

- Voriconazole

Anti-HIV Agents

- Efavirenz

Mental Health

Antiaddictives

- Bupropion
- Lofexidine
- Nicotine replacement therapy

Anti-ADHD Agents

- Amphetamine
- Atomoxetine
- Methylphenidate
- Viloxazine

Antidepressants

- Amitriptyline
- Amoxapine
- Citalopram
- Clomipramine
- Desipramine
- Doxepin
- Escitalopram
- Fluvoxamine
- Imipramine
- Nortriptyline
- Paroxetine
- Protriptyline
- Sertraline
- Trimipramine
- Venlafaxine
- Vortioxetine

Antipsychotics

- Aripiprazole
- Aripiprazole lauroxil
- Brexipiprazole
- Clozapine
- Haloperidol
- Iloperidone
- Perphenazine
- Pimozide
- Quetiapine
- Risperidone
- Thioridazine
- Zuclopenthixol

Benzodiazepines

- Diazepam

Neurology

Anticonvulsants

- Brivaracetam
- Fosphenytoin
- Phenytoin

Medications covered in Medcheck

Antidementia Agents

- Donepezil
- Galantamine

Antidepressants

- Amitriptyline
- Venlafaxine

Benzodiazepines

- Clobazam
- Diazepam

Beta Blockers

- Metoprolol
- Propranolol

Other Neurological Agents

- Deutetrabenazine
- Pitolisant
- Tetrabenazine
- Valbenazine

Rheumatology

NSAIDs

- Celecoxib
- Flurbiprofen
- Ibuprofen
- Meloxicam
- Methotrexate
- Piroxicam
- Tenoxicam

Urology

Alpha-Blockers

- Tamsulosin

Antispasmodics

- Darifenacin
- Fesoterodine
- Mirabegron
- Tolterodine

Other

Gaucher Disease

- Eliglustat

Dermatology

- Abrocitinib

Gynaecology

- Elagolix
- Flibanserin
- Oral Contraceptives

Hematology

- Avatrombopag
- Eltrombopag
- Lusutrombopag

Sjogren's Syndrome

- Cevimeline

Drug Gene Interaction updates reflect the most current evidence on specific drug-gene interactions, ensuring that our reports continue to meet the highest scientific and clinical standards. To achieve this, the GenXys report is frequently updated based on standardised databases and the latest available evidence
